

FROM OUR FARMS TO THE WORLD

# About Us

Combining the expertise of two leading Australian fresh produce companies, LaManna Premier Group (LPG) and Cutri Fruit, LPG Cutri Fruit Global offers importers, exporters, and wholesaler's premium Australian produce, fresh from the farm. Together, they strive for continuous innovation, taking only the best products and unique varieties to consumers globally.

#### Cutri Fruit

Cutri Fruit is a leading, third-generation family farm in Victoria, Australia. Spanning acres of peaches, plums, nectarines, and avocados, Cutri Fruit focus on innovation and growing flavourful varieties that are packed with health benefits.

#### LaManna Premier Group

LPG is one of Australia's largest fresh produce supply chain companies, providing domestic and overseas customers a single source of supply across a diverse range of fruit and vegetable categories.

## From our farms to you:

With farm production and support services Australia-wide, we're able to deliver you premium produce.

Farms include both open field growing and protected cropping, and are supported by:

- Climate-controlled distribution services
- Unique microclimate growing techniques
- Leading edge ripening facilities
- National quality systems that ensure all business operations adhere to strict protocols.

# Innovative and progressive growing

We remain focused on innovation, category development, and producing consistent, reliable varieties that are full of great taste, texture, and shelf life.

Our mission is to use systems, science, and technology to consistently deliver customer satisfaction on time, every time. These innovative techniques are further supported by Cravo technology, two-dimensional trellis growing, blemish sorting and drone technology.

#### **Cravo farming:**

LPG's Cravo facility in Lancaster, Victoria, is Australia's largest Cravo farming operation, spanning 5-hectares, and grows tomatoes hydroponically.

This facility supports:

- Retractable roof greenhouses
- Natural heating and cooling system
- Sustainable and environmentally friendly growing procedures
- Innovation of niche produce varieties

#### Two dimensioned trellis growing:

A growing method unique to Cutri Fruit, allowing for less chemical and water input, and is easier to prune, thin, and pick. From a production point, this method:

- · Allows for even light penetration across the tree
- Increases Brix (natural plant sugars)
- Generates higher fruit consistency

#### **Blemish sorting technology**

Cutri Fruit is the global leader in adopting and testing blemish sorting technology in stone fruits. Now into its 6th year of testing and improvements our MAF blemish sorting technology allows Cutri Fruit to;

- · Rely more on the use of technology to pre-sort rather than people
- Grade to client specifications
- Deliver a more consistent product to our customers

#### **Drone technology**

Drone technology allows Cutri Fruit to manage, maintain, and survey crop health.

Drone technology is used to distribute beneficial insects across the orchards, protecting crop against harmful insects and reducing the distribution of chemicals, ensuring quality fruit.

# Harvest Calendar

Being Australia's premier exporter of nectarines, peaches, plums, apricots, LPG Cutri Fruit Global send fruit around the globe. Below is a seasonality guide to stonefruit produce.
